

Chafing Dish Instructions

1. Fill the deep water pans with approximately 2 inches of hot water.
2. Remove the lid from each sterno provided and place the sterno into the heat cup.
3. Light sterno and adjust the lid of the heat cup to leave it approximately half open.
Note: The sterno should last for approximately 2 hours.
4. Place food pans filled with hot food inside the water pans. You can use the food pans for cooking or set them in the oven to keep the food warm.
5. Periodically check the water pans during the event to make sure there is sufficient water contained at all times. Do not use without water.

Important Reminders:

Do not light the sterno before putting water into the water pans.

Only use the sterno type fuel in the burner
